DETAILED ACTION

Response to Arguments

1. The double patenting rejection under anticipation is overcome by the amendment filed 3/4/2008. There are no species in the instant application that are encompassed by claim 1 of US 6765005.
2. As a result of withdrawn and cancelled claims, claims 1-2, 5, 6, 13-14, 17, 21-25, 27, 30-32, 34, 35, and 49-51 are being examined in the current office action.

Priority

3. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

The later-filed application must be an application for a patent for an invention which is also disclosed in the prior application (the parent or original nonprovisional application or provisional application). The disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

The disclosure of the prior-filed application, Application No. 60/431406, fails to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application. Provisional application does not provide support for the elected group and species in the instant application. Provisional application 60/431406 fails to provide support for the elected group because variable R₃ (which is equivalent to variable R₂ of the instant application) does not include a pyrido[2,3-e]-1,4-diazepine ring. Provisional application 60/431406 provides support for variable A when it is benzofuran. Provisional application 60/465583 provides support for the elected group and species, and consequently, priority for the elected group and species goes to 4/25/2003, the filing date of 60/465583.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-2, 5, 6, 13-14, 17, 21-25, 27, 30-32, 34, 35, and 49-51 are rejected under 35 U.S.C. 102(e) as being anticipated by Berman et al. (US20060142265, published June 29, 2006, included in IDS, claims priority back to 60/455189, March 17, 2003). Claim 1 is anticipated by structure #1 of column 1 (from the top down) of table 3e and structures in table 3f (#1 of column 1 from the top down and #5 of column 2 from the top down) anticipate the elected group and species because variable R₂ is pyrido[2,3-e]-1,4-diazepine, variable A is benzofuran, and variable L is C₂-alkenyl. Claim 6 is anticipated because NR¹ is NH or NMe. Claims 13, 14, 17, 50, and 51 are anticipated because variable is benzofuran, which is a 9-membered bicyclic heteroaryl ring with one oxygen. Claims 21-23 are anticipated because each of these claims are compound claims. Claims 24-25, 27, 30-32, 34-35, and 49 are anticipated because these compounds can be made into compositions (page 51, paragraphs 0622 and 0623). In addition, the second compound mentioned in figure 3f directly anticipates the elected species. Hence Berman et al anticipate claims 1-2, 5, 6, 13-14, 17, 21-25, 27, 30-32, 34, 35, and 49-51.

The applied reference has a common assignee and inventor(s) with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

This rejection is maintained because priority of the elected group and species only goes back to 4/25/2003.

Allowable Subject Matter

6. No claims are allowed.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
